Informed Consent

Changes to the law now require all practitioners who adjust the spine to warn patients of material risks. In extremely rare circumstances, some treatments of the neck may damage a blood vessel and give rise to stroke or stroke-like symptoms (approx. 1 in 5.85million)¹. Whilst this has never occurred in this practice, we are still required to warn you.

In other extremely rare circumstances there may be strain/injury to a ligament or disc in the neck (less than 1 in 139,000) or the low back (less than 1 in 62,000)².

Chiropractic adjustments of the spine are internationally recognised as being far safer in dealing with neck and low back pain than medication and many other alternatives³. At Chiropractic Health Clinic we use very gentle non manipulative techniques to adjust your baby.

Should our chiropractor accept your case for chiropractic care and you have any questions related to the treatment you may receive, please contact this office immediately.
